

UROS JEKNIC

FRONT-END DEVELOPER

PROFILE

Hello, I'm a seasoned web developer with over **5 years** of hands-on experience in crafting digital solutions that seamlessly blend **SEO and optimization** performance. My passion lies in translating clients' visions into user-friendly, high-performing websites that not only meet but **exceed** their expectations.

I use arch and neovim btw.

WORK EXPERIENCE

Noubis

Angular, NestJS, React, WordPress...

- Developed a custom email template builder and contributed to the admin dashboard
- Optimized performance with state management and optimistic updates using Angular in a declarative programming pattern
- Integrated authentication and authorization with Auth0

MassData Commerce/Priority Tire

NextJS, Magento

- Redesigned the website for a leading U.S. tire distributor, improving site performance and user experience
- Developed and maintained custom modules on the Magento eCommerce platform

Studio Present

Drupal (PHP), Java, React

- Developed an API that generates human-readable schedules with shift details, hours, and weekend assignments in XLSX and PDF formats using Optaplanner, integrating Google Sheets for hard/soft constraints and employee data
- Developed and maintained multiple high-traffic websites using Drupal

PERSONAL PROJECTS

Weekendr - <https://github.com/Yekna/weekendr/>

- Built a web application leveraging the Google Maps API to help users discover nearby parties and their music genres
- Implemented Progressive Web App (PWA) features with manifest.json, enabling installation on Android devices for a native-like experience

DJ Jukebox - <https://dj-jukebox.onrender.com/>

- Built a Go backend for real-time interactions and API handling, with the React frontend served via Go's embed package for a unified deployment.
- Implemented user features for song suggestions, voting, and live queue updates, with DJ controls to approve or reject submissions in real time.
